Medical Touch Monitor

True flat (P-Cap) and comply with DICOM Part 14 Medical AHVA Touch Monitor DT2162M

The new 2020 HMI medical touch display series is based on the needs of end users, and the sizes are 21.5 inches and 23.8 inches to carry AOPEN medical specification SBC including DE5500M and DE7600M. With the ultra-wide-angle 16:9 high-contrast display and plug-and-play PCAP 10-point touch function, users can effectively operate the display through a knob control. The design of the back cover and edges uses a larger angle to bend the surface to help reduce damage caused by collisions.

Considering that the display will be used in a medical environment, the medical touch display screen is waterproof and dustproof, and the entire screen is covered with AG glass, which is durable and easy to clean. Hidden ventilation holes help reduce the internal temperature, thereby extending the life of the parts. Built-in presets that comply with DICOM Part 14 standards ensure professional and accurate grayscale images and plug-and-play PCAP 10-point touch.

- World-class EN/UL 60601-1 Medical Safety Regulations and EMC Certifications
- Medical IPC design with 10points Multi-touch screen and gloved hand touch
- The medical touch monitor is waterproof and dustproof, the entire screen is covered with AG glass, which is durable and easy to clean
