

NOC

Be in control with a network operating centre. Combine several data sources to monitor the situation effectively on any number of screens and in any configuration.

AOPEN and Polywall offer a flexible and easy-to-use solution for medium-sized operating centres. Create different layouts, manage access rights and display data from any information system on your desired scheduled.

Work with a wide range of sources. Connect existing surveillance systems with HDMI video outputs. Ensure reliable 24/7 operations.

SAFETY FIRST

THE PROCESS

The Polywall software allows you to easily display any digital data or stream a video source.

Combine dashboards, monitoring data, live video feeds and other information in a layout of your choosing, send it to a video wall and get a comprehensive overview of the operations.

THE SCENARIOS

With the AOPEN DEV7610-X6 and the Polywall software you can create pre-sets for every single screen or the video wall as a whole.

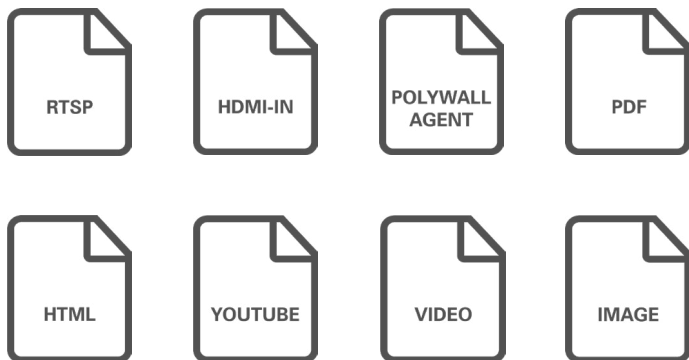

Schedule the content, or just a part of the content and keep your finger on the pulse.

Use multiple viewing source types to create the video wall best suited for your network operating centre.

Contact Polywall and AOPEN now for information at request@aopen.com or ir@polywall.net

THE DEVICE

The DEV7610-X6 is a powerful media player that runs 6 screens in 4K. It has two HDMI inputs to capture direct video signals from, for instance, digital data or a streaming video source.

THE KEY FEATURES

- 6x 4K @30Hz
- 6x Mini Display Ports and 1x DisplayPort 1.2
- 2x HDMI-in (1.4)
- Multiple source types
